

Restoration of Sakura Gomon [Cherry Gate]

Rebuilding Historic Structure

In order to allow visitors to experience the former appearance of Takamatsu Castle, we are promoting the restoration and maintenance of lost castle structures.

Sakura Gomon [Cherry Gate] was the first restoration project of castle structures to be carried out at the site of Takamatsu Castle. Restoring a

research to establish a basis for restoration. It was designed based on extensive research, including the collection of old photographs and drawings, and the results of excavation surveys, culminating in a completion that took 12 years (2011–2022). Although it is only open on specific dates and times, the interior is also open as an exhibition space. We warmly invite you to come and take a look.
